

Notice of Intent for New or Renewal of General Permit for Discharges from Small MS4s
Preamble

PREAMBLE
to
NOTICE OF INTENT FOR NEW OR RENEWAL OF GENERAL PERMIT FOR DISCHARGES
FROM SMALL MUNICIPAL SEPARATE STORM SEWER SYSTEMS - MS4S
describing
LAKE COUNTY'S COUNTYWIDE APPROACH
TO STORMWATER MANAGEMENT
and
THE LAKE COUNTY STORMWATER MANAGEMENT COMMISSION'S ROLE
AS A QUALIFYING LOCAL PROGRAM

The Lake County Stormwater Management Commission (SMC) was established by the Lake County Board in 1991. It succeeded the Lake County Stormwater Management Planning Committee, which was established in 1988 following the passage of enabling legislation by the Illinois General Assembly (55 ILCS 5/5-1062) in 1987. SMC's mission is to provide desired community services toward the primary goals of flood damage reduction and surface water quality improvement. The specific objectives that SMC is working to meet in order to achieve its primary goals of flood damage reduction and surface water quality improvement include: mitigate existing flood damages and prevent the occurrence of new damages in the future; repair, restore, maintain, and preserve natural and constructed drainage features and facilities in the county; improve surface water quality; promote awareness and understanding of stormwater management issues; and, establish, maintain, and distribute stormwater management data and information.

In working toward meeting these objectives, SMC follows a set of stormwater management policies that were created to define its roles and responsibilities for stormwater management in Lake County. These policies include: work to coordinate actions with municipalities and local county agencies to ensure efficient implementation of stormwater management activities; work interactively with partners in stormwater management across the county; provide direct technical services to local governments, agencies, and other groups to most effectively address regional, watershed, and interjurisdictional problems; provide public information, education, and training opportunities regarding stormwater management and raise awareness and capabilities throughout the county; and, facilitate local community input into local, federal, and state sponsored stormwater management activities across the county. The implementation of these policies has created a comprehensive, countywide approach to stormwater management in Lake County.

Consistent with this comprehensive, countywide approach to stormwater management, SMC serves as a Qualifying Local Program (QLP) for Municipal Separate Storm Sewer Systems (MS4s) in Lake County. As a QLP, SMC has been working since the early 2000's, when the Illinois Environmental Protection Agency (IEPA) began the process of expanding its NPDES Stormwater Program to include small MS4s, to assist Lake County MS4s in developing and implementing efficient and effective stormwater management programs.

In 2002, SMC proactively formed the Municipal Advisory Committee (MAC) to provide a forum for representatives of local MS4s, which include municipalities, townships, and drainage districts, to discuss, among other topics, the implementation of IEPA's NPDES Stormwater Program. At that time, as a result of conversations held at MAC meetings, informational workshops, and roundtable discussions, it was agreed that each Lake County MS4 would be responsible for obtaining coverage under IEPA's General NPDES Permit No. ILR40, through the submittal of a "Notice of Intent" to be covered under the permit,

Notice of Intent for New or Renewal of General Permit for Discharges from Small MS4s
Preamble

and for developing its own local stormwater management program, but that each MS4 could and should take credit for the stormwater management activities conducted by SMC.

Although SMC is not itself an MS4, as it does not own or operate a separate storm sewer system, it does perform activities related to each of the six minimum control measures (MCMs) described in IEPA's General NPDES Permit No. ILR40. These activities include:

- 1. Public Education and Outreach:** SMC distributes throughout Lake County a variety of informational materials related to stormwater management via its "take away" rack and website; provides, upon request, informational materials directly to Lake County MS4s for local distribution; provides educational presentations related to IEPA's NPDES Stormwater Program at MAC meetings and, upon request, to local MS4s; includes announcements related to IEPA's NPDES Stormwater Program on its website, in its newsletter, and in its annual report; with the assistance of the Lake County Division of Transportation, posts watershed identification signage throughout the county; sponsors or co-sponsors numerous workshops and events on a variety of stormwater management-related topics; develops and compiles, upon request, stormwater materials for inclusion in stormwater education kits; provides, upon request, information on, materials for, and training on storm drain stenciling; and, maintains a webpage dedicated to IEPA's Stormwater Program with resource materials such as model ordinances, case studies, and web links.
- 2. Public Participation/Involvement:** SMC conducts a number of public meetings each year, including MAC meetings and watershed committee meetings, where IEPA's NPDES Stormwater Program and its stormwater management activities are discussed, providing public notice of such meetings on its website and through direct mailings and e-mailings.
- 3. Illicit Discharge Detection and Elimination:** SMC provides model and example illicit discharge ordinances that prohibit all non-stormwater discharges to the storm sewer system; continues to administer and enforce the Lake County Watershed Development Ordinance (WDO), which includes provisions that prohibit illicit discharges to the storm sewer system during construction on development sites; and, sponsors or co-sponsors workshops on Illicit Discharge Detection and Elimination or other topics related to IEPA's NPDES Stormwater Program.
- 4. Construction Site Runoff Control:** SMC continues to administer and enforce the Lake County Watershed Development Ordinance (WDO), which establishes the minimum stormwater management requirements for development in Lake County, including requirements for construction site runoff control; administers the Designated Erosion Control Inspector (DECI) program, which was designed to help ensure that the construction site runoff control requirements of the Lake County WDO are met; provides training for those involved in the administration and enforcement of the Lake County WDO to help ensure that the construction site runoff control requirements of the Lake County WDO are met; follows established procedures for the receipt and consideration of construction site runoff control-related information submitted by the public; and, conducts or coordinates inspections of development sites to help ensure that the construction site runoff control requirements of the Lake County WDO are met.
- 5. Post-Construction Runoff Control:** SMC continues to administer and enforce the Lake County Watershed Development Ordinance, which establishes the minimum stormwater management requirements for development in Lake County, including requirements for post-construction runoff control; provides training for those involved in the administration and enforcement of the Lake County WDO to help ensure that the post-construction runoff control requirements of the Lake County WDO are met; conducts or coordinates inspections of development sites to help

Notice of Intent for New or Renewal of General Permit for Discharges from Small MS4s
Preamble

ensure that the post construction site runoff control requirements of the Lake County WDO are met; and, through its Watershed Management Board (WMB), provides partial funding for post-construction runoff control projects, including flood damage reduction and surface water quality improvement projects.

6. **Pollution Prevention/Good Housekeeping:** SMC maintains a list of known employee training resources and opportunities; makes available to Lake County MS4s a software-based employee training program; and, sponsors or co-sponsors training workshops related to pollution prevention/good housekeeping or other topics related to IEPA's NPDES Stormwater Program.

In addition to the stormwater management activities described above, SMC also provides, upon request, no-cost "consultant-level" technical assistance to Lake County MS4s in developing and implementing their stormwater management programs and provides them with a variety of resources to assist them in meeting the requirements of IEPA's General NPDES Permit No. ILR40. To date, these resources have included:

- Notice of Intent templates;
- Stormwater Management Program Plan templates;
- Annual Report templates;
- Annual "State of Lake County's Waters" reports;
- An Illicit Discharge Detection and Elimination guidance manual;
- Model and example illicit discharge ordinances that prohibit all non-stormwater discharges, including illegal dumping, to the storm sewer system;
- GIS and mapping data, including a countywide receiving waters map; and
- The Lake County Watershed Development Ordinance, which establishes the minimum stormwater management requirements for development in Lake County, including requirements for construction site and post-construction runoff control.

As IEPA's Stormwater Program continues to evolve, SMC is committed to providing continued and ongoing support to Lake County MS4s as they continue to develop and implement their stormwater management programs.

Notice of Intent for New or Renewal of General Permit for Discharges from Small Municipal Separate Storm Sewer Systems - MS4's

Part I. General Information

1. MS 4 Operator Name: Village of Fox Lake

2. MS4 Mailing Address: 66 Thillen Drive

City: Fox Lake

State: IL

3. Operator Type: Village

Other:

4. Operator Status: Local

Other:

5. Name(s) of governmental entity(ies) in which MS4 is located:

State of Illinois

County of Lake

Village of Fox Lake

6. Area of land that drains to your MS4 in square miles: 9.7

7. Latitude and Longitude at approximate geographical center of MS4 for which you are requesting authorization to discharge:

Latitude:

42N

23

48

Degrees

Minutes:

Seconds:

Longitude:

88W

11

01

Degrees:

Minutes:

Seconds:

8. Name(s) of known receiving waters

Upper Fox River

Grass Lake

Fish Lake Drain

Pistakee Lake

Lower Fox River

Squaw Creek

Fox Lake

Duck Lake

Nippersink Lake

Wooster Lake

9. Persons responsible for implementation or coordination of Stormwater Management Program:

Name: Donny Schmit Title: Mayor Phone: 847-587-2151

Area of Responsibility: _____

Name: Nancy Schuerr Title: Village Administrator Phone: 847-587-3942

Area of Responsibility: Administration of plan implementation

Additional Persons:

Dan Miller, Street Dept, 847-587-8570, Implementation of street and stormwater items

David Thomey, Building Dept, 847-589-3176, Implementation/enforcement of building and site techniques

Part II. Best Management Practices (include shared responsibilities) which have been implemented or are proposed to be implemented in the MS4 area:

A. Public Education and Outreach**Measurable Goals (include shared responsibilities)**

The Village of Fox Lake intends to share responsibility for the implementation of its stormwater management program with a Qualifying Local Program (QLP), as outlined below.

Please note that the current version of the Illinois Environmental Protection Agency's General NPDES Permit No. ILR40 (Permit) is scheduled to expire on March 31, 2014, and that the new version of the Permit, under which coverage is currently being sought through the submittal of this Notice of Intent (NOI), has not yet been released to the public. Although it is difficult to predict the changes that the Illinois Environmental Protection Agency (IEPA) will make to the new version of the Permit, both the QLP and the MS4 remain committed to performing activities related to each of the six MCMs described in the current version of the Permit.

Qualifying Local Program:

The Lake County Stormwater Management Commission (SMC) serves as a QLP for Lake County MS4s. As a QLP, SMC performs activities related to each of the six MCMs described in the Permit, including activities related to Public Education and Outreach. Following the expiration of the current version of the Permit on March 31, 2014, SMC plans to continue to perform a variety of activities related to the Public Education and Outreach MCM, as described in Attachment A.

MS4 Stormwater Management Program:

As part of its stormwater management program, the Village of Fox Lake conducts a number of Public Education and Outreach activities that educate and inform the public about the impacts of stormwater runoff on receiving water bodies and the steps that the public can take to reduce those impacts. In coordination and collaboration with the QLP, the Village of Fox Lake utilizes a variety of best management practices (BMPs) to educate and inform the public about these issues, including: distributing paper material containing information about stormwater management; sponsoring and/or attending community outreach events, including meetings, to provide information about stormwater management; publicizing household hazardous waste collection events sponsored by the Solid Waste Agency of Lake County (SWALCO) to encourage the public to participate in such events; upon request, providing classroom education on stormwater management to local students and teachers; upon request, providing training and information to local students and teachers interested in conducting storm drain stenciling; and, providing, on its website, information about stormwater management and its stormwater management program. Following the expiration of the current version of the Permit on March 31, 2014, the Village of Fox Lake plans to continue to perform a variety of activities related to the Public Education and Outreach MCM, as described in Attachment B.

QLP MS4

- ✓ A.1 Distributed Paper Material
- ✓ A.2 Speaking Engagement
- ✓ A.3 Public Service Announcement
- ✓ A.4 Community Event
- ✓ A.5 Classroom Education Material
- ✓ A.6 Other Public Education

Measurable Goals (include shared responsibilities)

The Village of Fox Lake intends to share responsibility for the implementation of its stormwater management program with a Qualifying Local Program (QLP), as outlined below.

Please note that the current version of the Illinois Environmental Protection Agency's General NPDES Permit No. ILR40 (Permit) is scheduled to expire on March 31, 2014, and that the new version of the Permit, under which coverage is currently being sought through the submittal of this Notice of Intent (NOI), has not yet been released to the public. Although it is difficult to predict the changes that the Illinois Environmental Protection Agency (IEPA) will make to the new version of the Permit, both the QLP and the MS4 remain committed to performing activities related to each of the six MCMs described in the current version of the Permit.

Qualifying Local Program:

The Lake County Stormwater Management Commission (SMC) serves as a QLP for Lake County MS4s. As a QLP, SMC performs activities related to each of the six MCMs described in the Permit, including activities related to Public Participation/Involvement. Following the expiration of the current version of the Permit on March 31, 2014, SMC plans to continue to perform a variety of activities related to the Public Participation/Involvement MCM, as described in Attachment A.

MS4 Stormwater Management Program:

As part of its stormwater management program, the Village of Fox Lake conducts a number of Public Participation/Involvement activities that involve and engage the public in the implementation of its stormwater management program. In coordination and collaboration with the QLP, the Village of Fox Lake utilizes a variety of best management practices (BMPs) to involve and engage the public in these efforts, including: attending and encouraging public participation in stakeholder meetings; presenting information about stormwater management and its stormwater management program at public meetings; attending and participating in Municipal Advisory Committee (MAC) meetings to discuss and coordinate on the implementation of IEPA's NPDES Stormwater Program; and, providing a phone number and maintaining a process for receiving and processing information about stormwater-related problems and concerns from the public. Following the expiration of the current version of the Permit on March 31, 2014, the Village of Fox Lake plans to continue to perform a variety of activities related to the Public Participation/Involvement MCM, as described in Attachment B.

QLP MS4

- ✓ B.3 Stakeholder Meeting
- ✓ B.4 Public Hearing
- B.5 Volunteer Monitoring
- ✓ B.6. Program Involvement
- B.7 Other Public Involvement

C. Illicit Discharge Detection and Elimination

Measurable Goals (include shared responsibilities)

The Village of Fox Lake intends to share responsibility for the implementation of its stormwater management program with a Qualifying Local Program (QLP), as outlined below. Note, however, that the primary responsibility for the implementation of the Illicit Discharge Detection and Elimination MCM lies with the Village of Fox Lake.

Please note that the current version of the Illinois Environmental Protection Agency's General NPDES Permit No. ILR40 (Permit) is scheduled to expire on March 31, 2014, and that the new version of the Permit, under which coverage is currently being sought through the submittal of this Notice of Intent (NOI), has not yet been released to the public. Although it is difficult to predict the changes that the Illinois Environmental Protection Agency (IEPA) will make to the new version of the Permit, both the QLP and the MS4 remain committed to performing activities related to each of the six MCMs described in the current version of the Permit.

Qualifying Local Program:

The Lake County Stormwater Management Commission (SMC) serves as a QLP for Lake County MS4s. As a QLP, SMC performs activities related to each of the six MCMs described in the Permit, including activities related to Illicit Discharge Detection and Elimination. Following the expiration of the current version of the Permit on March 31, 2014, SMC plans to continue to perform a variety of activities related to the Illicit Discharge Detection and Elimination MCM, as described in Attachment A.

MS4 Stormwater Management Program:

As part of its stormwater management program, the Village of Fox Lake conducts a number of activities related to Illicit Discharge Detection and Elimination. In accordance with the current version of the Permit, the Village of Fox Lake's Illicit Discharge Detection and Elimination program includes:

- A storm sewer system map showing the locations of all outfalls and the names and locations of all waters that receive discharges from those outfalls;
- A program to educate public employees, businesses, and the general public about the hazards associated with illegal discharges and improper disposal of waste; and,
- Periodic (annual is recommended) inspection of storm sewer outfalls for detection of non-stormwater discharges and illegal dumping.

Following the expiration of the current version of the Permit on March 31, 2014, the Village of Fox Lake plans to continue to perform a variety of activities related to the Illicit Discharge Detection and Elimination MCM, as described in Attachment B.

QLP MS4

- C.1 Sewer Map Preparation
- ✓ C.2 Regulatory Control Program
- C.3 Detection/Elimination Prioritization Plan
- C.4 Illicit Discharge Tracing Procedures
- C.5 Illicit Source Removal Procedures
- C.6 Program Evaluation and Assessment
- C.7 Visual Dry Weather Screening
- C.8 Pollutant Field Testing
- C.9 Public Notification
- ✓ C.10 Other Illicit Discharge Controls

Measurable Goals (include shared responsibilities)

Lake County has adopted a countywide Watershed Development Ordinance (WDO) that establishes the minimum stormwater management requirements for development in Lake County. The WDO, which is administered and enforced within the Village of Fox Lake by the MS4, establishes standards for Construction Site Runoff Control.

Although the Village of Fox Lake intends to share responsibility for the implementation of its stormwater management program with a Qualifying Local Program (QLP), as outlined below, the primary responsibility for the implementation of the Construction Site Runoff Control MCM lies with the MS4, as the Village of Fox Lake is currently a Certified Community, as defined by the WDO.

Please note that the current version of the Illinois Environmental Protection Agency's General NPDES Permit No. ILR40 (Permit) is scheduled to expire on March 31, 2014, and that the new version of the Permit, under which coverage is currently being sought through the submittal of this Notice of Intent (NOI), has not yet been released to the public. Although it is difficult to predict the changes that the Illinois Environmental Protection Agency (IEPA) will make to the new version of the Permit, both the QLP and the MS4 remain committed to performing activities related to each of the six MCMs described in the current version of the Permit.

Qualifying Local Program:

The Lake County Stormwater Management Commission (SMC) serves as a QLP for Lake County MS4s. As a QLP, SMC performs activities related to each of the six MCMs described in the current version of the Permit, including activities related to Construction Site Runoff Control. Following the expiration of the current version of the Permit on March 31, 2014, SMC plans to continue to perform a variety of activities related to the Construction Site Runoff Control MCM, as described in Attachment A.

MS4 Stormwater Management Program:

In accordance with the current version of the Permit, the Village of Fox Lake has developed and implemented a Construction Site Runoff Control program to reduce the amount of pollution contained in construction stormwater runoff that enters the Village of Fox Lake's storm sewer system from development sites. The Village of Fox Lake has adopted the Lake County WDO and is currently certified by SMC to administer and enforce the provisions of the WDO. The Village of Fox Lake's designated Enforcement Officer is responsible for reviewing and permitting development plans and for administering and enforcing the provisions of the WDO within the Village of Fox Lake. Following the expiration of the current version of the Permit on March 31, 2014, the Village of Fox Lake plans to continue to perform a variety of activities related to the Construction Site Runoff Control MCM, as described in Attachment B.

QLP MS4

- ✓ D.1 Regulatory Control Program
- ✓ D.2 Erosion and Sediment Control BMPs
- ✓ D.3 Other Waste Control Program
- ✓ D.4 Site Plan Review Procedures
- ✓ D.5 Public Information Handling Procedures
- ✓ D.6 Site Inspection/Enforcement Procedures
- D.7 Other Construction Site Runoff Controls

E. Post-Construction Runoff Control

Page 6 of 14

Measurable Goals (include shared responsibilities)

As described above, Lake County has adopted a countywide Watershed Development Ordinance (WDO) that establishes the minimum stormwater management requirements for development in Lake County. The WDO, which is administered and enforced within the Village of Fox Lake by the Village of Fox Lake, establishes standards for Post-Construction Runoff Control.

Although the Village of Fox Lake intends to share responsibility for the implementation of its stormwater management program with a Qualifying Local Program (QLP), as outlined below, the primary responsibility for the implementation of the Post-Construction Runoff Control MCM lies with the Village of Fox Lake, as the Village of Fox Lake is currently a Certified Community, as defined by the WDO.

Please note that the current version of the Illinois Environmental Protection Agency's General NPDES Permit No. ILR40 (Permit) is scheduled to expire on March 31, 2014, and that the new version of the Permit, under which coverage is currently being sought through the submittal of this Notice of Intent (NOI), has not yet been released to the public. Although it is difficult to predict the changes that the Illinois Environmental Protection Agency (IEPA) will make to the new version of the Permit, both the QLP and the MS4 remain committed to performing activities related to each of the six MCMs described in the current version of the Permit.

Qualifying Local Program:

The Lake County Stormwater Management Commission (SMC) serves as a QLP for Lake County MS4s. As a QLP, SMC performs activities related to each of the six MCMs described in the current version of the Permit, including activities related to Post-Construction Runoff Control. Following the expiration of the current version of the Permit on March 31, 2014, SMC plans to continue to perform a variety of activities related to the Post-Construction Runoff Control MCM, as described in Attachment A.

MS4 Stormwater Management Program:

In accordance with the current version of the Permit, the Village of Fox Lake has developed and implemented a Post-Construction Runoff Control program to reduce the amount of pollution contained in post-construction stormwater runoff that enters the Village of Fox Lake's storm sewer system from development sites. The Village of Fox Lake has adopted the Lake County WDO and is currently certified by SMC to administer and enforce the provisions of the WDO. The Village of Fox Lake's designated Enforcement Officer is responsible for reviewing and permitting development plans and for administering and enforcing the provisions of the WDO within the Village of Fox Lake. Following the expiration of the current version of the Permit on March 31, 2014, the Village of Fox Lake plans to continue to perform a variety of activities related to the Post-Construction Runoff Control MCM, as described in Attachment B.

QLP MS4

- E.1 Community Control Strategy
- ✓ E.2 Regulatory Control Program
- ✓ E.3 Long Term O & M Procedures
- ✓ E.4 Pre-Construction Review of BMP Designs
- ✓ E.5 Site Inspections During Construction
- ✓ E.6 Post-Construction Inspections
- ✓ E.7 Other Post-Construction Runoff Controls

Measurable Goals (include shared responsibilities)

The Village of Fox Lake intends to share responsibility for the implementation of its stormwater management program with a Qualifying Local Program (QLP), as outlined below. Note, however, that the primary responsibility for the implementation of the Pollution Prevention/Good Housekeeping MCM lies with the Village of Fox Lake.

Please note that the current version of the Illinois Environmental Protection Agency's General NPDES Permit No. ILR40 (Permit) is scheduled to expire on March 31, 2014, and that the new version of the Permit, under which coverage is currently being sought through the submittal of this Notice of Intent (NOI), has not yet been released to the public. Although it is difficult to predict the changes that the Illinois Environmental Protection Agency (IEPA) will make to the new version of the Permit, both the QLP and the MS4 remain committed to performing activities related to each of the six MCMs described in the current version of the Permit.

Qualifying Local Program:

The Lake County Stormwater Management Commission (SMC) serves as a QLP for Lake County MS4s. As a QLP, SMC performs activities related to each of the six MCMs described in the current version of the Permit, including activities related to Pollution Prevention/Good Housekeeping. Following the expiration of the current version of the Permit on March 31, 2014, SMC plans to continue to perform a variety of activities related to Pollution Prevention/Good Housekeeping, as described in Attachment A.

MS4 Stormwater Management Program:

In accordance with the current version of the Permit, the Village of Fox Lake has developed and implemented a Pollution Prevention/Good Housekeeping program to reduce the amount of pollution generated by municipal activities and operations. The program includes: an employee training program; an operation and maintenance program that incorporates pollution prevention and good housekeeping practices into day-to-day activities and operations; stormwater pollution control and non-stormwater discharge control procedures; waste management and disposal procedures; and, spill prevention, control, and cleanup procedures. Following the expiration of the current version of the Permit on March 31, 2014, the Village of Fox Lake plans to continue to perform a variety of activities related to the Pollution Prevention/Good Housekeeping MCM, as described in Attachment B.

QLP MS4

- ✓ F.1 Employee Training Program
- F.2 Inspection and Maintenance Program
- F.3 Municipal Operations Storm Water Control
- F.4 Municipal Operations Waste Disposal
- ✓ F.5 Flood Management/Assess Guidelines
- F.6 Other Municipal Operations Controls

Part III. Certification

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for knowingly submitting false information, including the possibility of fines and imprisonment.

Any person who knowingly makes a false, fictitious, or fraudulent material statement, orally or in writing, to the Illinois EPA commits a Class 4 felony. A second or subsequent offense after conviction is a Class 3 felony (415 ILCS 5/44 (h)).

ATTACHMENT A
SUMMARY OF PROPOSED QLP STORMWATER MANAGEMENT ACTIVITIES

The Lake County Stormwater Management Commission (SMC) serves as a Qualifying Local Program (QLP) for Municipal Separate Storm Sewer Systems (MS4s) in Lake County. As a QLP, SMC has been working since the early 2000's, when the Illinois Environmental Protection Agency (IEPA) began the process of expanding its NPDES Stormwater Program to include small MS4s, to assist Lake County MS4s in developing and implementing efficient and effective stormwater management programs.

Although SMC is not itself an MS4, as it does not own or operate a separate storm sewer system, it does perform activities related to each of the six minimum control measures (MCMs) described in IEPA's General NPDES Permit No. ILR40. Please note that the current version of IEPA's General NPDES Permit No. ILR40 (Permit) is scheduled to expire on March 31, 2014, and that the new version of the Permit, under which coverage is currently being sought through the submittal of this Notice of Intent (NOI), has not yet been released to the public. Although it is difficult to predict the changes that IEPA will make to the new version of the Permit, SMC remains committed to performing activities related to the six MCMs described in the current version of the Permit. Following the expiration of the current version of the Permit on March 31, 2014, SMC plans to continue to perform a variety of stormwater management activities, as described in more detail below.

A. Public Education and Outreach

SMC will continue to support Lake County MS4s in the development and implementation of their stormwater management programs by performing activities related to the Public Education and Outreach MCM, as described below.

A.1 Distributed Paper Material

SMC compiles, develops, and distributes throughout Lake County a variety of materials related to stormwater management. SMC has produced a number of pamphlets and brochures related to stormwater management and prepares a quarterly newsletter, "Mainstream," as well as an Annual Report, which highlight successful stormwater management activities conducted throughout Lake County. SMC also prepares project fact sheets that provide information about ongoing and recently completed stormwater management projects. In addition, SMC has developed or collaborated on a number of manuals related to stormwater management, such as "Riparian Areas Management: A Citizen's Guide," "A Citizen's Guide to Maintaining Stormwater Best Management Practices," and the "Streambank Stabilization Manual," and will continue to develop or collaborate on such manuals or manual updates on an as-needed basis.

*Measurable Goal(s): Distribute informational materials from "take away" rack at SMC.
Upon request, distribute informational materials directly to Lake County MS4s for local distribution.*

Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.

A.2 Speaking Engagement

SMC provides educational presentations related to IEPA's NPDES Stormwater Program on a regular basis at Municipal Advisory Committee (MAC) meetings. Upon request, SMC will provide educational presentations related to IEPA's NPDES Stormwater Program to Lake County MS4s.

Notice of Intent for New or Renewal of General Permit for Discharges from Small MS4s
Summary of Proposed QLP Stormwater Management Activities

Measurable Goal(s): *Provide educational presentations related to IEPA's NPDES Stormwater Program at MAC meetings.*
Upon request, provide educational presentations related to IEPA's NPDES Stormwater Program (e.g., "The Big Picture: Water Quality, Regulations & NPDES") to Lake County MS4s.

Milestone(s): *SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

A.3 Public Service Announcement

A public service announcement related to IEPA's NPDES Stormwater Program will be included in SMC's quarterly newsletter, "Mainstream," at least once each year. SMC will coordinate with the Lake County Department of Transportation (LCDOT) to post watershed identification signage in watersheds where watershed planning or project implementation efforts have occurred or are occurring.

Measurable Goal(s): *Include public service announcement related to IEPA's NPDES Stormwater Program in its quarterly newsletter, "Mainstream," at least once each year.*
Post watershed identification signage in cooperation and collaboration with LCDOT.

Milestone(s): *SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

A.4 Community Event

SMC regularly sponsors and co-sponsors educational and technical training workshops on a variety of stormwater management-related topics. Each year, SMC will sponsor or co-sponsor at least one workshop on a topic related to IEPA's NPDES Stormwater Program, such as soil erosion and sediment control, illicit discharge detection and elimination, or stormwater best management practices (BMPs) that can be used to protect and improve water quality.

Measurable Goal(s): *Sponsor or co-sponsor workshop on a topic related to IEPA's NPDES Stormwater Program.*

Milestone(s): *SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

A.5 Classroom Education Material

Upon request, SMC will contribute to the development and compilation of materials for inclusion in a stormwater education kit that can be distributed to local students and teachers and/or other local stakeholders. Additionally, upon request, SMC will provide information, materials, and training to local students and teachers and/or other local stakeholders interested in conducting storm drain stenciling.

Notice of Intent for New or Renewal of General Permit for Discharges from Small MS4s
Summary of Proposed QLP Stormwater Management Activities

Measurable Goal(s): Upon request, develop and compile materials for inclusion in a stormwater education kit.
Upon request, provide information, materials, and training to local students teachers and/or stakeholders interested in conducting storm drain stenciling.

Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.

A.6 Other Public Education

SMC maintains a website that contains a variety of materials and resources related to stormwater management. The website includes webpages such as "National Pollutant Discharge Elimination System Stormwater Program," "Best Management Practices," "Projects," "Publications," "Watershed Management Plans," "Partnerships," and "Advisory Committees." These webpages provide information about IEPA's NPDES Stormwater Program, provide information about stormwater best management practices (BMPs), allow for download of stormwater management-related publications and documents, provide notices of upcoming meetings and ongoing projects, and provide links to a number of other stormwater management-related resources.

Measurable Goal(s): Maintain and update the portion of the SMC website dedicated to IEPA's NPDES Stormwater Program with resources such as model ordinances, case studies, brochures, and links.

Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.

B. Public Participation/Involvement

SMC will continue to support Lake County MS4s in the development and implementation of their stormwater management programs by performing activities related to the Public Participation/Involvement MCM, as described below.

B.3 Stakeholder Meeting

SMC is actively involved in watershed planning throughout Lake County. SMC believes that the watershed planning process cannot happen and will not be successful without the input, interest, and commitment of the watershed stakeholders. Watershed stakeholders may include municipalities, townships, drainage districts, homeowner associations, lakes management associations, developers, landowners, and local, county, state, and federal agencies.

Measurable Goal(s): Provide notice of stakeholder meetings on SMC website.
Track number of watershed committee meetings conducted.
Establish watershed planning committees for each new watershed planning effort.

Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.

B.4 Public Hearing

SMC coordinates and conducts public meetings as well as committee meetings that are open to the public. A monthly Stormwater Management Commission meeting is open to the public and involves the SMC Board of Commissioners, which includes six municipal representatives and six county board members.

The Technical Advisory Committee (TAC) was created in 1992 to assist in the development, review, and revision of the Watershed Development Ordinance (WDO) and the associated administrative policies and procedures. TAC is made up of representatives from the development, environmental, municipal, and consulting engineering fields. TAC meetings are held monthly or on an as-needed basis.

The Municipal Advisory Committee (MAC) is made up of municipal, township, drainage district, consulting firm, and county representatives. MAC has worked to discuss, coordinate, and collaborate on the implementation of IEPA's NPDES Stormwater Program. MAC will continue to meet quarterly or as needed to assist Lake County MS4s with the implementation of IEPA's NPDES Stormwater Program.

The Watershed Management Board (WMB) meets annually to make recommendations on stormwater BMP project funding. WMB members include chief municipal elected officials, township supervisors, drainage district chairs, and county board members from each district within each of Lake County's four major watersheds.

*Measurable Goal(s): Provide notice of public meetings on SMC website.
Track number of meetings conducted.*

Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.

B.6 Program Involvement

Consistent with Lake County's comprehensive, countywide approach to stormwater management, SMC serves as a Qualifying Local Program (QLP) for all Lake County MS4s. In this role, in 2002, SMC proactively formed the Municipal Advisory Committee (MAC) to provide a forum for representatives of local MS4s, which include municipalities, townships, and drainage districts, to discuss, among other topics, the implementation of IEPA's NPDES Stormwater Program. SMC will continue to facilitate quarterly MAC meetings and will continue to provide general support to Lake County MS4s as they continue to develop and implement their stormwater management programs. SMC will prepare an annual report on its stormwater management activities and will provide guidance to Lake County MS4s in preparing their own annual reports.

*Measurable Goal(s): Track number of MAC meetings conducted.
Prepare annual report on Qualifying Local Program stormwater management activities.
Prepare template for use by Lake County MS4s in creating their own annual reports.*

Notice of Intent for New or Renewal of General Permit for Discharges from Small MS4s
Summary of Proposed QLP Stormwater Management Activities

Milestone(s): *SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

C. Illicit Discharge Detection and Elimination

SMC will continue to support Lake County MS4s in the development and implementation of their stormwater management programs by performing activities related to the Illicit Discharge Detection and Elimination MCM, as described below. Note, however, that the primary responsibility for the implementation of the Illicit Discharge Detection and Elimination MCM lies with the MS4.

C.2 Regulatory Control Program

SMC provides local MS4s with model and example illicit discharge ordinances that prohibit all non-stormwater discharges, including illegal dumping, to the storm sewer system. Additionally, the WDO includes provisions that prohibit illicit discharges to the storm sewer system during construction (i.e., prior to final site stabilization) on development sites.

Measurable Goal(s): *Provide model and example illicit discharge ordinances to Lake County MS4s. Continue to administer and enforce the WDO.*

Milestone(s): *SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

C.10 Other Illicit Discharge Controls

SMC regularly sponsors and co-sponsors educational and technical training workshops on a variety of stormwater management-related topics. Each year, SMC will sponsor or co-sponsor an illicit discharge detection and elimination workshop or other training workshop related to IEPA's NPDES Stormwater Program and track the number of attendees that attend the workshop.

Additionally, as part of its public education and outreach efforts, SMC distributes informational materials throughout Lake County about the hazards associated with illegal discharges and the improper disposal of waste.

Measurable Goal(s): *Sponsor or co-sponsor and track the number of attendees at an Illicit Discharge Detection and Elimination workshop or other training workshop related to IEPA's NPDES Stormwater Program.*
Distribute informational materials about the hazards of illicit discharges and illegal dumping from "take away" rack at SMC and SMC website.

Milestone(s): *SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

D. Construction Site Runoff Control

Lake County has adopted a countywide Watershed Development Ordinance (WDO) that establishes the minimum stormwater management requirements for development in Lake County, including requirements for construction site runoff control. SMC will continue to support Lake County MS4s in the implementation of the Construction Site Runoff Control MCM by administering and enforcing the WDO and performing other stormwater management activities, as described below. Note, however, that the primary responsibility for the implementation of the Construction Site Runoff

Notice of Intent for New or Renewal of General Permit for Discharges from Small MS4s
Summary of Proposed QLP Stormwater Management Activities

Control MCM in certified communities (i.e., communities certified by SMC to administer and enforce the provisions of the WDO) lies with the MS4.

D.1 Regulatory Control Program

The WDO is the regulatory mechanism that requires the use of soil erosion and sediment controls on development sites throughout Lake County. The soil erosion and sediment control provisions of the WDO are included in Article IV, Section B.1.j. of the ordinance. At a minimum, these standards apply to any development project that hydrologically disturbs 5,000 square feet of land or more.

SMC has also created a Designated Erosion Control Inspector (DECI) program. The purpose of the program is to facilitate positive communication between the permit issuing agency, whether such agency be SMC or a certified community, and the permit holder, by creating a single point of contact for the discussion and resolution of site soil erosion and sediment control issues and concerns. Furthermore, the program is intended to improve site conditions, minimize environmental impacts, and educate contractors, developers, and inspectors about the use of soil erosion and sediment control BMPs. It is worth noting that the DECI program was designed to closely mirror the inspection requirements of IEPA's General NPDES Permit No. ILR10.

Measurable Goal(s): Continue to administer and enforce the WDO.

Continue to administer the Designated Erosion Control Inspector (DECI) program outlined by the WDO.

Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.

D.2 Erosion and Sediment Control BMPs

Article IV, Section B.1.j of the WDO specifies the soil erosion and sediment control measures that must be used in conjunction with any land disturbing activities conducted on a development site. It specifies the use of a variety of soil erosion and sediment control BMPs including: minimize soil disturbance; protect adjoining properties from erosion and sedimentation; complete installation of soil erosion and sediment control features prior to commencement of hydrologic disturbance; stabilize disturbed areas within 7 days of active disturbance; avoid disturbance of streams whenever possible; use controls that are appropriate for the size of the tributary drainage area; protect functioning storm sewers from sediment; prevent sediment from being tracked onto adjoining streets; limit earthen embankments to slopes of 3H:1V; identify soil stockpile areas; and utilize statewide standards and specifications as guidance for soil erosion and sediment control.

SMC has also prepared a Technical Reference Manual (TRM) to accompany the WDO. The TRM is used to guide the creation of development plans that are in compliance with the provisions of the WDO and provides detailed information on the use of soil erosion and sediment control BMPs. It is currently being updated by the Technical Advisory Committee (TAC).

Measurable Goal(s): Continue to administer and enforce the WDO.

Continue to work on updates to the Technical Reference Manual (TRM) and toward publication of the updated document.

Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.

D.3 Other Waste Control Program

Article IV, Section B.1.j of the WDO includes provisions related to the control of waste and debris during construction on development sites.

Measurable Goal(s): Continue to administer and enforce the provisions of the WDO related to the control of waste and debris during construction on development sites.

Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.

D.4 Site Plan Review Procedures

A community's designated enforcement officer is responsible for reviewing and permitting development plans and for administering and enforcing the provisions of the WDO. Within certified communities (i.e., communities certified by SMC to administer and enforce the provisions of the WDO), responsibility for reviewing and permitting development plans and for administering and enforcing the provisions of the WDO lies with the MS4; within non-certified communities, the designated enforcement officer is SMC's chief engineer. All designated enforcement officers must pass an exam in order to qualify to act as such. SMC administers this enforcement officer program, providing training on an as-needed basis to all enforcement officers to assist them in passing the exam, and maintains an up-to-date list identifying each community's designated enforcement officer. In addition to administering the enforcement officer program, SMC periodically reviews each community's WDO administration and enforcement records, using the results of such review to evaluate the performance of certified communities and designated enforcement officers.

SMC has also prepared a Technical Reference Manual (TRM) to accompany the WDO. The TRM is used to guide the creation of development plans that are in compliance with the provisions of the WDO and provides additional guidance on the administration and enforcement of the ordinance. It is currently being updated by the Technical Advisory Committee (TAC).

*Measurable Goal(s): Administer the Enforcement Officer (EO) program outlined by the WDO.
Maintain an up-to-date list identifying each community's designated enforcement officer.
Periodically review each community's WDO administration and enforcement records.
Continue to work on updates to the Technical Reference Manual (TRM) and toward publication of the updated document.*

Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.

D.5 Public Information Handling Procedures

SMC provides a number of opportunities for the receipt and consideration of information submitted by the public. SMC's Citizen Inquiry Response System (CIRS) documents and tracks the resolution of problems and complaints reported by the public. SMC's website provides information on "who to call" for various stormwater-related problems and concerns. An Interagency Coordination Agreement between SMC, the US Army Corps of Engineers, and the National Resources Conservation Service specifies that if any of these agencies receive a report of a soil erosion and

Notice of Intent for New or Renewal of General Permit for Discharges from Small MS4s
Summary of Proposed QLP Stormwater Management Activities

sediment control issue, they will relay such report to SMC. SMC will then investigate the report and prescribe appropriate corrective actions, sharing the results of such investigation with the property owner and any applicable local, state, or federal agencies. Within certified communities, such investigations are coordinated with the community's designated enforcement officer.

Measurable Goal(s): *Document and track the number of soil erosion and sediment control-related complaints received and processed by SMC.*

Milestone(s): *SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

D.6 Site Inspection/Enforcement Procedures

Article VI of the WDO contains both recommended and minimum requirements for the inspection of development sites. Within certified communities, the community's designated enforcement officer is responsible for conducting these inspections; within non-certified communities, SMC's chief engineer is responsible for conducting these inspections. Per the ordinance, these inspections may be conducted by a community's designated enforcement officer at any stage in the construction process. For major developments, as defined by the WDO, the enforcement officer conducts site inspections, at a minimum, upon completion of installation of soil erosion and sediment controls, prior to the start of any other land disturbing activities, and after final stabilization and landscaping, prior to the removal of soil erosion and sediment controls.

Article VII of the WDO specifies the legal actions that may be taken and the penalties that may be imposed if the provisions of the WDO are violated. If development activities on a development site are not in compliance with the requirements of the WDO, the enforcement officer may issue a stop work order on all development activity on the development site or on the development activities that are in direct violation of the WDO. In addition, failure to comply with any of the requirements of the WDO constitutes a violation of the WDO, and any person convicted of violating the WDO may be fined.

Measurable Goal(s): *Document and track the number of site inspections conducted by SMC.*

Milestone(s): *SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.*

E. Post-Construction Runoff Control

As described above, Lake County has adopted a countywide Watershed Development Ordinance (WDO) that establishes the minimum stormwater management requirements for development in Lake County, including requirements for post-construction runoff control. SMC will continue to support Lake County MS4s in the implementation of the Post-Construction Runoff Control MCM by administering and enforcing the WDO and performing other stormwater management activities, as described below. Note, however, that the primary responsibility for the implementation of the Post-Construction Runoff Control MCM in certified communities (i.e., communities certified by SMC to administer and enforce the provisions of the WDO) lies with the MS4.

E.2 Regulatory Control Program

The WDO requires all applicants to adopt stormwater management strategies for controlling post-construction stormwater runoff on development sites. As outlined in Article IV, Section B.1 of the

Notice of Intent for New or Renewal of General Permit for Discharges from Small MS4s
Summary of Proposed QLP Stormwater Management Activities

WDO, all applicants must adopt stormwater management strategies that minimize increases in stormwater runoff rates, volumes, and pollutant loads from development sites. Proposed stormwater management strategies must address the runoff volume reduction requirements described in Article IV, Section B.1.d of the WDO and must include appropriate stormwater BMPs to address the other applicable post-construction runoff control requirements of the WDO.

Measurable Goal(s): Continue to administer and enforce the WDO.

Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.

E.3 Long Term O&M Procedures

The WDO requires that maintenance plans be developed for all stormwater management systems designed to serve major developments, as defined by the WDO. Such maintenance plans must include: a description of all maintenance tasks; an identification of the party or parties responsible for performing such maintenance tasks; a description of all permanent maintenance easements or access agreements, overland flow paths, and compensatory storage areas; and a description of dedicated sources of funding for the required maintenance. The WDO also requires that all stormwater management systems be located within a deed or plat restriction (e.g., easement) to ensure that the system remains in place in perpetuity and that access to the system is maintained in perpetuity for inspection and maintenance purposes.

Measurable Goal(s): Continue to administer and enforce the WDO.

Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.

E.4 Pre-Construction Review of BMP Designs

As described above, a community's designated enforcement officer is responsible for reviewing and permitting development plans and for administering and enforcing the provisions of the WDO. This includes a review of the stormwater BMPs that will be used to meet the post-construction runoff control requirements of the WDO.

Measurable Goal(s): Continue to administer and enforce the WDO.

Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.

E.5 Site Inspections During Construction

As described above, Article VI of the WDO contains both recommended and minimum requirements for the inspection of development sites. Per the ordinance, these inspections may be conducted by a community's designated enforcement officer at any stage in the construction process. For major developments, as defined by the WDO, the enforcement officer conducts site inspections, at a minimum, upon completion of installation of soil erosion and sediment controls, prior to the start of any other land disturbing activities, and after final stabilization and landscaping, prior to the removal of soil erosion and sediment controls.

Measurable Goal(s): Continue to administer and enforce the WDO.

Notice of Intent for New or Renewal of General Permit for Discharges from Small MS4s
Summary of Proposed QLP Stormwater Management Activities

Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.

E.6 Post-Construction Inspections

As described above, Article VI of the WDO contains both recommended and minimum requirements for the inspection of development sites. Per the ordinance, these inspections may be conducted by a community's designated enforcement officer at any stage in the construction process, including after final stabilization and landscaping, after the removal of soil erosion and sediment controls. For major developments, as defined by the WDO, the enforcement officer conducts site inspections, at a minimum, upon completion of installation of soil erosion and sediment controls, prior to the start of any other land disturbing activities, and after final stabilization and landscaping, prior to the removal of soil erosion and sediment controls.

Measurable Goal(s): Continue to administer and enforce the WDO.

Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.

E.7 Other Post-Construction Runoff Controls

Through the Watershed Management Board (WMB), SMC provides partial funding for flood damage reduction and surface water quality improvement projects. The WMB, which includes representatives from the Lake Michigan, North Branch of the Chicago River, Fox River, and Des Plaines River watersheds, meets annually to review potential projects and to make recommendations on stormwater BMP project funding. Members of the WMB include chief municipal elected officials, township supervisors, drainage district chairmen, and county board members from each district found within each of Lake County's four major watersheds. The goal of the WMB program is to maximize opportunities for local units of government and other groups to have input and influence on the solutions used to address local stormwater management problems. Previous WMB-funded projects have reduced flooding, improved surface water quality, and enhanced existing stormwater management facilities throughout Lake County.

*Measurable Goal(s): Conduct annual WMB meeting.
Contribute funding to flood damage reduction and water quality improvement projects through the WMB.*

Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.

F. Pollution Prevention/Good Housekeeping

SMC will continue to support Lake County MS4s in the development and implementation of their stormwater management programs by performing activities related to the Pollution Prevention/Good Housekeeping MCM, as described below. Note, however, that the primary responsibility for the implementation of the Pollution Prevention/Good Housekeeping MCM lies with the MS4.

Notice of Intent for New or Renewal of General Permit for Discharges from Small MS4s
Summary of Proposed QLP Stormwater Management Activities

F.1 Employee Training Program

SMC will assist Lake County MS4s with the development and implementation of their employee training programs by maintaining a list of known employee training resources and opportunities, making available a software-based employee training program, and providing, upon request, technical assistance to local MS4s in developing and implementing their employee training programs. In addition, each year, SMC will sponsor or co-sponsor a training workshop related to pollution prevention/good housekeeping or another workshop related to IEPA's NPDES Stormwater Program.

Measurable Goal(s): Maintain a list of known employee training resources and opportunities. Make available the Excal Visual Storm Watch: Municipal Storm Water Pollution Prevention software-based employee training program. Sponsor or co-sponsor a training workshop related to pollution prevention/good housekeeping or another training workshop related to IEPA's NPDES Stormwater Program.

Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.

F.5 Flood Management/Assess Guidelines

In working toward meeting its primary goals of flood damage reduction and surface water quality improvement, SMC follows a set of stormwater management policies that were created to define its roles and responsibilities for stormwater management in Lake County. One of these policies is to integrate multi-objective opportunities (e.g., flood damage reduction, surface water quality improvement, environmental enhancement) into SMC-sponsored projects. In accordance with this policy, SMC will evaluate all SMC-sponsored projects for multi-objective opportunities.

Measurable Goal(s): Track number of SMC-sponsored projects that are reviewed for multi-objective opportunities.

Milestone(s): SMC began implementation of this BMP in March 2003 and will continue to implement it on an annual basis.

Notice of Intent for New or Renewal of General Permit for Discharges from Small MS4s
Summary of Proposed MS4 Stormwater Management Activities

ATTACHMENT B
SUMMARY OF PROPOSED MS4 STORMWATER MANAGEMENT ACTIVITIES

As part of its stormwater management program, the Village of Fox Lake conducts a number of activities related to each of the six minimum control measures (MCMs) described in IEPA's General NPDES Permit No. ILR40. Please note that the current version of IEPA's General NPDES Permit No. ILR40 (Permit) is scheduled to expire on March 31, 2014, and that the new version of the Permit, under which coverage is currently being sought through the submittal of this Notice of Intent (NOI), has not yet been released to the public. Although it is difficult to predict the changes that IEPA will make to the new version of the Permit, the Village of Fox Lake remains committed to performing activities related to each of the six MCMs described in the current version of the Permit. Following the expiration of the current version of the Permit on March 31, 2014, the Village of Fox Lake plans to continue to perform a variety of stormwater management activities, as described in more detail below.

A. Public Education and Outreach

As part of its stormwater management program, the Village of Fox Lake conducts a number of Public Education and Outreach activities that educate and inform the public about the impacts of stormwater runoff on receiving water bodies and the steps that the public can take to reduce those impacts. In coordination and collaboration with the QLP, the Village of Fox Lake will continue to perform activities related to the Public Education and Outreach MCM, as described below.

A.1 Distributed Paper Material

The SMC develops and distributes a variety of materials related to stormwater management in Lake County. A number of pamphlets and brochures related to BMPs and stormwater management have been produced.

Measurable Goal(s): *-Provide new information on BMPs to homeowners associations known to have BMPs in place, as they become available.*
-Make information from LC-SMC available for pick-up at Village Hall and/or electronically on Village website.
-Develop and adopt SMPP template, provided by QLP, related to this provision by end of this permit term.

Milestone(s): *-The Village of Fox Lake has implemented this BMP and will continue to implement it on an annual basis.*

A.4 Community Event

Solid Waste Agency of Lake County (SWALCO) holds household waste collection events in various communities throughout Lake County, which assist in collecting waste before it enters the storm sewer system.

Measurable Goal(s): *-Publicize SWALCO events or provide a link to SWALCO on Village website, at a minimum.*
-Cooperate with SWALCO to host waste collection events within the Village on an occasional basis.
-Attend annual technical training and public awareness workshops as sponsored by SMC regarding soil erosion and sediment control training by key Building Department and Public Works staff.

Notice of Intent for New or Renewal of General Permit for Discharges from Small MS4s
Summary of Proposed MS4 Stormwater Management Activities

-Develop and adopt SMPP template, provided by QLP, related to this provision by end of this permit term.

Milestone(s): *-The Village of Fox Lake has implemented this BMP and will continue to implement it on an annual basis.*

A.5 Classroom Education Material

The SMC develops stormwater educational materials for local teachers. The Village of Fox Lake will, at a minimum, make this information available to all citizen groups and local classrooms upon request. The Village of Fox Lake has begun testing different stormwater inlet stenciling products. They will continue to look for opportunities to involve citizen groups in a stenciling program.

Measurable Goal(s): *-Make educational materials available for teachers upon request.
-Continue implementation of stenciling program utilizing citizen groups (such as school children) in the activities.
-Develop and adopt SMPP template, provided by QLP, related to this provision by end of this permit term.*

Milestone(s): *-The Village of Fox Lake has implemented this BMP and will continue to implement it on an annual basis.*

A.6 Other Public Education

In addition to the QLP's efforts to distribute information via its website, which are described in more detail in Attachment A, the Village of Fox Lake maintains a website that contains materials and resources related to stormwater management. The website includes a webpage that provides information about IEPA's NPDES Stormwater Program, information about the Village of Fox Lake's stormwater management program, Annual Reports, and links to a number of other stormwater management-related resources, including the Lake County Stormwater Management Commission's (i.e., QLP's) website.

Measurable Goal(s): *-Post pertinent Village of Fox Lake stormwater-related information on the Village website.
-Post NPDES Phase II and BMP resources on the Village website.
-Develop and adopt SMPP template, provided by QLP, related to this provision by end of this permit term.*

Milestone(s): *-The Village of Fox Lake has implemented this BMP and will continue to implement it on an annual basis.*

B. Public Education and Outreach

As part of its stormwater management program, the Village of Fox Lake conducts a number of Public Participation/Involvement activities that involve and engage the public in the implementation of its stormwater management program. In coordination and collaboration with the QLP, the Village of Fox Lake will continue to perform activities related to the Public Education and Outreach MCM, as described below.

Notice of Intent for New or Renewal of General Permit for Discharges from Small MS4s
Summary of Proposed MS4 Stormwater Management Activities

B.3 Stakeholder Meeting

Stakeholder meetings are conducted throughout the county for ongoing planning and project implementation efforts. When stakeholder groups (such as watershed planning committees) include the jurisdictional area of Fox Lake, the Village will publicize stakeholder meetings locally and participate by being represented at the stakeholder meetings.

Measurable Goal(s): -Continue to monitor all stakeholder meetings and send a representative to all meetings which are relevant to the Village of Fox Lake.

Milestone(s): -The Village of Fox Lake has implemented this BMP and will continue to implement it on an annual basis.

B.4 Public Hearing

The Village of Fox Lake will present updated information at Village Board Meetings, when applicable, regarding any stormwater regulation changes and/or SMPP development.

*Measurable Goal(s): -Present stormwater related updates at public Board Meetings.
-Develop and adopt SMPP template, provided by QLP, related to this provision by end of this permit term.
-Upon completion of SMPP template, present to Village Board for review and approval.*

Milestone(s): -The Village of Fox Lake has implemented this BMP and will continue to implement it on an annual basis.

B.6 Program Involvement

SMC serves as a Qualifying Local Program (QLP) for all Lake County MS4s. In this role, in 2002, SMC proactively formed the Municipal Advisory Committee (MAC) to provide a forum for representatives of local MS4s to discuss, among other topics, the implementation of IEPA's NPDES Stormwater Program. SMC plans to continue to facilitate quarterly MAC meetings to bring Lake County MS4s together to discuss the implementation of IEPA's NPDES Stormwater Program. The Village of Fox Lake will continue to attend and participate in the quarterly MAC meetings.

*Measurable Goal(s): -Continue to attend all MAC meetings and monitor all NPDES Phase II stormwater guidance presented by LC-SMC.
-Develop and adopt SMPP template, provided by QLP, related to this provision by end of this permit term.*

Milestone(s): -The Village of Fox Lake has implemented this BMP and will continue to implement it on an annual basis.

B.7 Other Public Involvement

The Village of Fox Lake will maintain and publicize illicit discharge/illegal dumping contact numbers for citizens to report illegal dumping and suspicious discharges.

Measurable Goal(s): -Publish a complaint contact telephone number on Village website for public reporting of any stormwater compliance issues. Track these complaints and their corresponding resolutions.

Notice of Intent for New or Renewal of General Permit for Discharges from Small MS4s
Summary of Proposed MS4 Stormwater Management Activities

-Develop and adopt SMPP template, provided by QLP, related to this provision by end of this permit term.

Milestone(s): *-The Village of Fox Lake has implemented this BMP and will continue to implement it on an annual basis.*

C. Illicit Discharge Detection and Elimination

As part of its stormwater management program, the Village of Fox Lake conducts a number of activities related to Illicit Discharge Detection and Elimination. In accordance with the current version of the Permit, the Village of Fox Lake's Illicit Discharge Detection and Elimination program includes:

- A storm sewer system map showing the locations of all outfalls and the names and locations of all waters that receive discharges from those outfalls;
- An ordinance or other regulatory mechanism that prohibits all non-stormwater discharges into the storm sewer system and provides the authority for appropriate enforcement procedures and actions;
- A plan to detect and address all non-stormwater discharges, including illegal dumping, into the storm sewer system;
- A program to educate public employees, businesses, and the general public about the hazards associated with illegal discharges and improper disposal of waste; and,
- Periodic (annual is recommended) inspection of storm sewer outfalls for detection of non-stormwater discharges and illegal dumping.

In coordination and collaboration with the QLP, the Village of Fox Lake will continue to perform activities related to the Illicit Discharge Detection and Elimination MCM, as described below. Note that although the Village of Fox Lake intends to share responsibility for the implementation of the Illicit Discharge Detection and Elimination MCM with the QLP, as outlined in this NOI, the primary responsibility for the implementation of the Illicit Discharge Detection and Elimination MCM lies with the Village of Fox Lake.

C.1 Sewer Map Preparation

The Village of Fox Lake has prepared an outfall map, under the original NOI, to allow for tracking of dry weather flow inspections and outfall maintenance.

Measurable Goal(s): *-Maintain and update outfall map.*
-Develop and adopt SMPP template, provided by QLP, related to this provision by end of this permit term.

Milestone(s): *-The Village of Fox Lake has implemented this BMP and will continue to implement it on an annual basis.*

C.2 Regulatory Control Program

The Village of Fox Lake will continue to prohibit non-storm water discharges to the storm sewer or drainage system through enforcement of the Lake County WDO and Village Code. The WDO includes provisions, which prohibit illegal dumping to the storm sewer or drainage system.

Notice of Intent for New or Renewal of General Permit for Discharges from Small MS4s
Summary of Proposed MS4 Stormwater Management Activities

Measurable Goal(s): *-Continue to enforce the ordinances and issue citations as necessary.
-Develop and adopt SMPP template, provided by QLP, related to this provision by end of this permit term.*

Milestone(s): *-The Village of Fox Lake has implemented this BMP and will continue to implement it on an annual basis.*

C.3 Detection/Elimination Prioritization Plan

The Village of Fox Lake will continue implementing the schedule developed under the original NOI regarding illicit discharges. Detection methods include dry-weather screening during daily maintenance activities, regular storm sewer maintenance, and catch basin cleaning. Storm sewer and catch basin cleaning will continue to be completed at least once every 2 years. Perform dry weather screening during regular maintenance activities of all outfalls on a rotating basis with each outfall being inspected at least once every 5 years.

Measurable Goal(s): *-Perform outfall inspections at least once every 5 years.
-Continue storm sewer and catch basin cleaning once every 2 years to help in detection of illicit discharges.
- Document all inspections and record potential illicit discharges.
-Develop and adopt SMPP template, provided by QLP, related to this provision by end of this permit term.*

Milestone(s): *-The Village of Fox Lake has implemented this BMP and will continue to implement it on an annual basis.*

C.4 Illicit Discharge Tracing Procedures

The Village of Fox Lake will continue implementing the schedule developed under the original NOI regarding illicit discharges. Detection methods include dry-weather screening during maintenance activities, regular storm sewer maintenance, and catch basin cleaning. Storm sewer and catch basin cleaning will continue to be completed at least once every 2 years. Perform dry weather screening of all outfalls on a rotating basis with each outfall being inspected at least once every 5 years.

Measurable Goal(s): *-Continue to utilize storm sewer map for illicit discharge tracing, as applicable.
-Document all illicit discharges discovered and the actions taken for resolution.
-Develop and adopt SMPP template, provided by QLP, related to this provision by end of this permit term.*

Milestone(s): *-The Village of Fox Lake has implemented this BMP and will continue to implement it on an annual basis.*

C.5 Illicit Source Removal Procedures

The Village of Fox Lake will continue implementing the schedule developed under the original NOI regarding illicit discharges. Detection methods include dry-weather screening during maintenance activities, regular storm sewer maintenance, and catch basin cleaning. Storm sewer and catch basin cleaning will continue to be completed at least once every 2 years. Perform dry weather screening of all outfalls on a rotating basis with each outfall being inspected at least once every 5 years.

Notice of Intent for New or Renewal of General Permit for Discharges from Small MS4s
Summary of Proposed MS4 Stormwater Management Activities

Measurable Goal(s): *-Track complaints received and corresponding resolutions.
-Develop and adopt SMPP template, provided by QLP, related to this provision by end of this permit term.*

Milestone(s): *-The Village of Fox Lake has implemented this BMP and will continue to implement it on an annual basis.*

C.6 Program Evaluation and Assessment

Periodically evaluate and assess the IDDE portion of the program. Collaborate and share information about IDDE program and results through MAC (sponsored by LC-SMC).

Measurable Goal(s): *-Continue to enforce ordinances.
-Develop and adopt SMPP template, provided by QLP, related to this provision by end of this permit term.*

Milestone(s): *-The Village of Fox Lake has implemented this BMP and will continue to implement it on an annual basis.*

C.7 Visual Dry Weather Screening

The Village of Fox Lake will continue implementing the schedule developed under the original NOI regarding illicit discharges. Detection methods include dry-weather screening during maintenance activities, regular storm sewer maintenance, and catch basin cleaning. Storm sewer and catch basin cleaning will continue to be completed at least once every 2 years. Perform dry weather screening of all outfalls on a rotating basis with each outfall being inspected at least once every 5 years.

Measurable Goal(s): *-Perform outfall inspections at least once every 5 years.
-Continue storm sewer and catch basin cleaning once every 2 years to help in detection of illicit discharges.
-Develop and adopt SMPP template, provided by QLP, related to this provision by end of this permit term.*

Milestone(s): *-The Village of Fox Lake has implemented this BMP and will continue to implement it on an annual basis.*

C.9 Public Notification

In order to promote compliance with the EPA NPDES program within the Village of Fox Lake, informational material will be distributed to all permitted dischargers within the Village in coordination with their business renewal licenses. This information packet will contain literature regarding illicit discharges and other stormwater related topics.

Measurable Goal(s): *-Make illicit discharge information available on the Village website for commercial/industrial businesses which are permitted stormwater dischargers.
-Notify property owners of any illicit discharges detected from their property.
-Consider additional language in SMPP template language, and incorporate into program by end of this permit term.*

Notice of Intent for New or Renewal of General Permit for Discharges from Small MS4s
Summary of Proposed MS4 Stormwater Management Activities

Milestone(s): -The Village of Fox Lake has implemented this BMP and will continue to implement it on an annual basis.

C.10 Other Illicit Discharge Controls

As part of its Public Education and Outreach program, the Village of Fox Lake distributes informational materials to businesses and the general public about the hazards associated with illegal discharges and the improper disposal of waste.

Measurable Goal(s): -Distribute informational materials about the hazards of illicit discharges and illegal dumping to all permitted dischargers within the Village in coordination with business renewal licenses and through the Village of Fox Lake website.

Milestone(s): -The Village of Fox Lake has implemented this BMP and will continue to implement it on an annual basis.

D. Construction Site Runoff Control

Lake County has adopted a countywide Watershed Development Ordinance (WDO) that establishes the minimum stormwater management requirements for development in Lake County. The WDO, which is enforced by SMC as well as by certified communities in the county, establishes standards for Construction Site Runoff Control. Although the Village of Fox Lake intends to share responsibility for the implementation of the Construction Site Runoff Control MCM with the QLP, as outlined in this NOI, the primary responsibility for the implementation of the Construction Site Runoff Control MCM lies with the MS4 as the Village of Fox Lake is currently a Certified Community as defined by the WDO. The enforcement of the WDO implements BMPs as described below.

D.1 Regulatory Control Program

The WDO is the regulatory mechanism that requires the use of soil erosion and sediment controls on development sites throughout Lake County. The soil erosion and sediment control provisions of the WDO are included in Article IV, Section B.1.j. of the ordinance. At a minimum, these standards apply to any development project that hydrologically disturbs 5,000 square feet of land or more. As a Certified Community, the Village of Fox Lake is responsible for the administration and enforcement of the WDO within the Village of Fox Lake.

*Measurable Goal(s): -Enforce WDO.
-Administer the Designated Erosion Control Inspector Program as outlined by the WDO.
-Develop and adopt SMPP template, provided by QLP, related to this provision by end of this permit term.*

Milestone(s): -The Village of Fox Lake has implemented this BMP and will continue to implement it on an annual basis.

D.2 Erosion and Sediment Control BMPs

Article IV, Section B.1.j of the WDO specifies the soil erosion and sediment control measures that must be used in conjunction with any land disturbing activities conducted on a development site. It specifies the use of a variety of soil erosion and sediment control BMPs including: minimize soil

Notice of Intent for New or Renewal of General Permit for Discharges from Small MS4s
Summary of Proposed MS4 Stormwater Management Activities

disturbance; protect adjoining properties from erosion and sedimentation; complete installation of soil erosion and sediment control features prior to commencement of hydrologic disturbance; stabilize disturbed areas within 7 days of active disturbance; avoid disturbance of streams whenever possible; use controls that are appropriate for the size of the tributary drainage area; protect functioning storm sewers from sediment; prevent sediment from being tracked onto adjoining streets; limit earthen embankments to slopes of 3H:1V; identify soil stockpile areas; and utilize statewide standards and specifications as guidance for soil erosion and sediment control. As a Certified Community, the Village of Fox Lake is responsible for the administration and enforcement of the WDO within the Village of Fox Lake.

Measurable Goal(s): *-Enforce WDO.
-Continue construction site inspection within Village for compliance with ordinances.
-Develop and adopt SMPP template, provided by QLP, related to this provision by end of this permit term.*

Milestone(s): *The Village of Fox Lake has implemented this BMP and will continue to implement it on an annual basis.*

D.3 Other Waste Control Program

Article IV, Section B.1.j of the WDO includes provisions related to the control of waste and debris during construction on development sites. As a Certified Community, the Village of Fox Lake is responsible for the administration and enforcement of the WDO within the Village of Fox Lake.

Measurable Goal(s): *-Enforce WDO.
-Continue brush collection program within the Village.
-Develop and adopt SMPP template, provided by QLP, related to this provision by end of this permit term.*

Milestone(s): *-The Village of Fox Lake has implemented this BMP and will continue to implement it on an annual basis.*

D.4 Site Plan Review Procedures

A community's designated enforcement officer is responsible for reviewing and permitting development plans and for administering and enforcing the provisions of the WDO. Within certified communities (i.e., communities certified by SMC to administer and enforce the provisions of the WDO), responsibility for reviewing and permitting development plans and for administering and enforcing the provisions of the WDO lies with the MS4; within non-certified communities, the designated enforcement officer is SMC's chief engineer. Since the Village of Fox Lake is a Certified Community, the Village of Fox Lake's designated enforcement officer is responsible for reviewing and permitting development plans and for administering and enforcing the provisions of the WDO within the Village of Fox Lake.

Measurable Goal(s): *-Enforce WDO.
-Develop and adopt SMPP template, provided by QLP, related to this provision by end of this permit term.*

Notice of Intent for New or Renewal of General Permit for Discharges from Small MS4s
Summary of Proposed MS4 Stormwater Management Activities

Milestone(s): *-The Village of Fox Lake has implemented this BMP and will continue to implement it on an annual basis.*

D.5 Public Information Handling Procedures

The Village of Fox Lake provides and publicizes a phone number that the public can use to submit information about stormwater-related problems and concerns. The Village of Fox Lake documents and tracks the resolutions of problems and complaints reported by the public, including reports of soil erosion and sediment control issues on development sites. Since the Village of Fox Lake is a Certified Community, the Village of Fox Lake's designated enforcement officer is responsible for investigating reports of soil erosion and sediment control issues on development sites within the Village of Fox Lake.

Measurable Goal(s): *-Continue to track and respond to all erosion and sediment control complaints received.
-Develop and adopt SMPP template, provided by QLP, related to this provision by end of this permit term.*

Milestone(s): *-The Village of Fox Lake has implemented this BMP and will continue to implement it on an annual basis.*

D.6 Site Inspection/Enforcement Procedures

Article VI of the WDO contains both recommended and minimum requirements for the inspection of development sites. Within certified communities, the community's designated enforcement officer is responsible for conducting these inspections; within non-certified communities, SMC's chief engineer is responsible for conducting these inspections. Per the ordinance, these inspections may be conducted by a community's designated enforcement officer at any stage in the construction process. For major developments, as defined by the WDO, the enforcement officer conducts site inspections, at a minimum, upon completion of installation of soil erosion and sediment controls, prior to the start of any other land disturbing activities, and after final stabilization and landscaping, prior to the removal of soil erosion and sediment controls. Since the Village of Fox Lake is a Certified Community, the Village of Fox Lake's designated enforcement officer is responsible for conducting site inspections within the Village of Fox Lake.

Article VII of the WDO specifies the legal actions that may be taken and the penalties that may be imposed if the provisions of the WDO are violated. If development activities on a development site are not in compliance with the requirements of the WDO, the enforcement officer may issue a stop work order on all development activity on the development site or on the development activities that are in direct violation of the WDO. In addition, failure to comply with any of the requirements of the WDO constitutes a violation of the WDO, and any person convicted of violating the WDO may be fined.

Measurable Goal(s): *-Continue inspection and enforcement of all construction site and sediment and erosion control procedures within the Village of Fox Lake.
-Develop and adopt SMPP template, provided by QLP, related to this provision by end of this permit term.*

Milestone(s): *-The Village of Fox Lake has implemented this BMP and will continue to implement it on an annual basis.*

E. Post-Construction Runoff Control

As described above, Lake County has adopted a countywide Watershed Development Ordinance (WDO) that establishes the minimum stormwater management requirements for development in Lake County. The WDO, which is administered and enforced within the Village of Fox Lake by the MS4 establishes standards for Post-Construction Runoff Control. These standards apply to new development or redevelopment resulting in over 0.5 acres of new impervious area. Although the Village of Fox Lake intends to share responsibility for the implementation of the Post-Construction Runoff Control MCM with the QLP, as outlined in this NOI, the primary responsibility for the implementation of the Post-Construction Runoff Control MCM lies with the MS4 as the Village of Fox Lake is currently a Certified Community as defined by the WDO. The enforcement of the WDO implements BMPs as described below.

E.2 Regulatory Control Program

The WDO requires all applicants to adopt stormwater management strategies for controlling post-construction stormwater runoff on development sites. As outlined in Article IV, Section B.1 of the WDO, all applicants must adopt stormwater management strategies that minimize increases in stormwater runoff rates, volumes, and pollutant loads from development sites. Proposed stormwater management strategies must address the runoff volume reduction requirements described in Article IV, Section B.1.d of the WDO and must include appropriate stormwater BMPs to address the other applicable post-construction runoff control requirements of the WDO. As a Certified Community, the Village of Fox Lake is responsible for the administration and enforcement of the WDO within the Village of Fox Lake.

Measurable Goal(s): *-Enforce WDO.*

-Develop and adopt SMPP template, provided by QLP, related to this provision by end of this permit term.

Milestone(s): *-The Village of Fox Lake has implemented this BMP and will continue to implement it on an annual basis.*

E.3 Long Term O&M Procedures

The Village of Fox Lake's long-term operation and maintenance procedures address new development via the WDO. The WDO requires that maintenance plans be developed for all stormwater management systems designed to serve major developments, as defined by the WDO. Such maintenance plans must include: a description of all maintenance tasks; an identification of the party or parties responsible for performing such maintenance tasks; a description of all permanent maintenance easements or access agreements, overland flow paths, and compensatory storage areas; and a description of dedicated sources of funding for the required maintenance. The WDO also requires that all stormwater management systems be located within a deed or plat restriction (e.g., easement) to ensure that the system remains in place in perpetuity and that access to the system is maintained in perpetuity for inspection and maintenance purposes. As a Certified Community, the Village of Fox Lake is responsible for the administration and enforcement of the WDO within the Village of Fox Lake.

Measurable Goal(s): *-Enforce WDO.*

-Continue providing new information to Homeowner's Associations as it becomes available.

Notice of Intent for New or Renewal of General Permit for Discharges from Small MS4s
Summary of Proposed MS4 Stormwater Management Activities

- Investigate all reported complaints regarding structural BMP maintenance and enforce if necessary.*
- Develop and adopt SMPP template, provided by QLP, related to this provision by end of this permit term.*

Milestone(s): *-The Village of Fox Lake has implemented this BMP and will continue to implement it on an annual basis.*

E.4 Pre-Construction Review of BMP Designs

As described above, a community's designated enforcement officer is responsible for reviewing and permitting development plans and for administering and enforcing the provisions of the WDO. This includes a review of the stormwater BMPs that will be used to meet the post-construction runoff control requirements of the WDO. Since the Village of Fox Lake is a Certified Community, the Village of Fox Lake's designated enforcement officer is responsible for reviewing and permitting development plans and for administering and enforcing the provisions of the WDO within the Village of Fox Lake.

Measurable Goal(s): *-Enforce WDO.*
-Develop and adopt SMPP template, provided by QLP, related to this provision by end of this permit term.

Milestone(s): *-The Village of Fox Lake has implemented this BMP and will continue to implement it on an annual basis.*

E.5 Site Inspections During Construction

As described above, Article VI of the WDO contains both recommended and minimum requirements for the inspection of development sites. Per the ordinance, these inspections may be conducted by a community's designated enforcement officer at any stage in the construction process. For major developments, as defined by the WDO, the enforcement officer conducts site inspections, at a minimum, upon completion of installation of soil erosion and sediment controls, prior to the start of any other land disturbing activities, and after final stabilization and landscaping, prior to the removal of soil erosion and sediment controls. Since the Village of Fox Lake is a Certified Community, the Village of Fox Lake's designated enforcement officer is responsible for conducting site inspections within the Village of Fox Lake.

Measurable Goal(s): *-Enforce WDO.*
-Continue periodic site visits of construction sites and follow-up visits in response to complaints received.
-Develop and adopt SMPP template, provided by QLP, related to this provision by end of this permit term.

Milestone(s): *-The Village of Fox Lake has implemented this BMP and will continue to implement it on an annual basis.*

E.6 Post-Construction Inspections

As described above, Article VI of the WDO contains both recommended and minimum requirements for the inspection of development sites. Per the ordinance, these inspections may be conducted by a community's designated enforcement officer at any stage in the construction process, including

Notice of Intent for New or Renewal of General Permit for Discharges from Small MS4s
Summary of Proposed MS4 Stormwater Management Activities

after final stabilization and landscaping, after the removal of soil erosion and sediment controls. For major developments, as defined by the WDO, the enforcement officer conducts site inspections, at a minimum, upon completion of installation of soil erosion and sediment controls, prior to the start of any other land disturbing activities, and after final stabilization and landscaping, prior to the removal of soil erosion and sediment controls. Since the Village of Fox Lake is a Certified Community, the Village of Fox Lake's designated enforcement officer is responsible for conducting site inspections within the Village of Fox Lake.

Measurable Goal(s): *-Enforce WDO.
-Develop and adopt SMPP template, provided by QLP, related to this provision by end of this permit term.*

Milestone(s): *-The Village of Fox Lake has implemented this BMP and will continue to implement it on an annual basis.*

F. Pollution Prevention/Good Housekeeping

In accordance with the current version of the Permit, the Village of Fox Lake has developed and implemented a Pollution Prevention/Good Housekeeping program to reduce the amount of pollution generated by municipal activities and operations. The program includes: an operation and maintenance program that incorporates pollution prevention and good housekeeping into day-to-day activities and operations; spill prevention and response procedures; and, an employee training program.

In coordination and collaboration with the QLP, the Village of Fox Lake will continue to perform activities related to the Pollution Prevention/Good Housekeeping minimum control measure, as described below. Note that although the Village of Fox Lake intends to share responsibility for the implementation of the Pollution Prevention/Good Housekeeping MCM with the QLP, as outlined in this NOI, the primary responsibility for the implementation of the Pollution Prevention/Good Housekeeping MCM lies with the Village of Fox Lake.

F.1 Employee Training Program

Implement training program, established under original NOI, for select municipal employees. SMC, the Qualifying Local Program, will serve as a clearinghouse of these materials.

Measurable Goal(s): *-Conduct Public Works new hire employee training regarding waste disposal, spill cleanup, and facilities operation and maintenance.
-Attend LC-SMC sponsored training events as applicable for all key Building Department and Public Works staff.
-Conduct information sharing opportunities where employees can share information from other seminars attended with other staff.
-Develop and adopt SMPP template, provided by QLP, related to this provision by end of this permit term.*

Milestone(s): *-The Village of Fox Lake has implemented this BMP and will continue to implement it on an annual basis.*

F.2 Inspection and Maintenance Program

The Pollution Prevention/Good Housekeeping program completed under the original NOI includes measures to reduce the amount and type of pollution that: (1) collects on streets, parking lots, open spaces, and storage and vehicle maintenance areas and is discharged into local waterways; and (2) results from actions such as environmentally damaging land development and flood management practices or poor maintenance of storm sewer systems. Street sweeping is performed on all streets at the beginning of the Spring season, and major streets and streets with storm sewers are swept regularly through the Spring, Summer, and Fall seasons. Conduct storm sewer and catch basin cleaning at least once every 2 years and dry weather screening of all outfalls at least once every 5 years.

Measurable Goal(s): *-Continue street sweeping at the schedule developed in the original NOI.
-Perform outfall inspections and storm sewer and catch basin cleaning at the schedule developed in the original NOI.
-Develop and adopt SMPP template, provided by QLP, related to this provision by end of this permit term.*

Milestone(s): *-The Village of Fox Lake has implemented this BMP and will continue to implement it on an annual basis.*

F.3 Municipal Operations Stormwater Control

As part of its pollution prevention/good housekeeping efforts, the Village of Fox Lake has identified municipal activities and operations with the potential to cause stormwater pollution or result in a non-stormwater discharge (e.g., vehicle maintenance, winter roadway maintenance). Through its employee training and operation and maintenance programs, the Village of Fox Lake works to incorporate pollution prevention and good housekeeping practices into these activities and operations.

Measurable Goal(s): *-Continue periodic evaluation of municipal facilities.
-Update facilities with necessary stormwater controls, if applicable.
-Continue minimizing the use of road salt applicable by utilizing a salt/sand application mix.
-Continue implementation of SWPPP for Public Works.
-Develop and adopt SMPP template, provided by QLP, related to this provision by end of this permit term.*

Milestone(s): *-The Village of Fox Lake has implemented this BMP and will continue to implement it on an annual basis.*

F.4 Municipal Operations Waste Disposal

Waste management consists of implementing non-structural (i.e., procedural) and structural pollution prevention and good housekeeping practices for handling, storing, and disposing of wastes generated by municipal activities and operations. Through its operation and maintenance programs, the Village of Fox Lake works to incorporate these waste management practices into its day-to-day activities and operations to prevent the release of waste into the storm sewer system.

Measurable Goal(s): *-Develop and adopt SMPP template, provided by QLP, related to this provision by end of this permit term.*

Notice of Intent for New or Renewal of General Permit for Discharges from Small MS4s
Summary of Proposed MS4 Stormwater Management Activities

Milestone(s): *-The Village of Fox Lake has implemented this BMP and will continue to implement it on an annual basis.*

F.6 Other Municipal Operations Controls

The Village of Fox Lake has developed spill prevention, control, and cleanup procedures to prevent and respond to spills that result from municipal activities and operations. Through its employee training and operation and maintenance programs, the Village of Fox Lake works to incorporate these spill prevention, control, and cleanup procedures into its day-to-day activities and operations to prevent the release of spills into the storm sewer system.

Measurable Goal(s): *-Continue to incorporate spill prevention, control, and cleanup procedures into day-to-day activities and operations.*
-Consider additional language in SMPP template language, and incorporate into program by end of this permit term.

Milestone(s): *-The Village of Fox Lake has implemented this BMP and will continue to implement it on an annual basis.*
